# ANY ROOM, ANY SEASON

Single-Zone Efficiencies up to: 33 SEER / 14.2 HSPF Multi-Zone Efficiencies up to: 19.7 SEER / 10.3 HSPF

### **A Year-Round Solution**

Revolutionary mini-split heat pumps provide both heating and cooling for year-round comfort in most climates. A simple push of a button on the remote control allows you to switch from heating to cooling (or vice versa) automatically.

Savings up to

on utility bills

\*Savings may vary based on model selected, hours of operation and geographical location. Example given based on 33-SEER system versus 14-SEER system.

The new degree of comfort."

### YEAR-ROUND, WHOLE-HOME OR BUSINESS ENERGY EFFICIENT HEATING AND COOLING

#### WHAT IS A MINI-SPLIT?

Mini-Splits are ductless systems that eliminate the need for a basement or attic-located evaporator unit and ductwork by using thin copper tubing that pumps refrigerant directly to discreet wall mounted units inside. Even more remarkable, this same unit works in reverse in winter, absorbing heat from the outside air and moving it indoors to heat your home. The result? Efficient cooling and heating for year-round, whole-home comfort in most climates.

Available in numerous mix-and-match capacities, Rheem® offers a mini-split system for even the most difficult to heat and cool areas.

#### **HOW DOES A MINI-SPLIT WORK?**

Like your refrigerator, heat pumps use electricity to pump refrigerant and transfer heat from one space to another. Heat pumps transfer heat from the outdoors to within the home.

### INDIVIDUAL ZONING: PERSONALIZED WHOLE HOME COMFORT

Ductless Heat Pump Mini-Split systems are some of today's most advanced forms of heating and cooling. One outdoor unit can operate up to 5 indoor units, simultaneously providing just the right amount of comfort control to each zone. Rheem systems are super quiet as well as highly energy efficient.

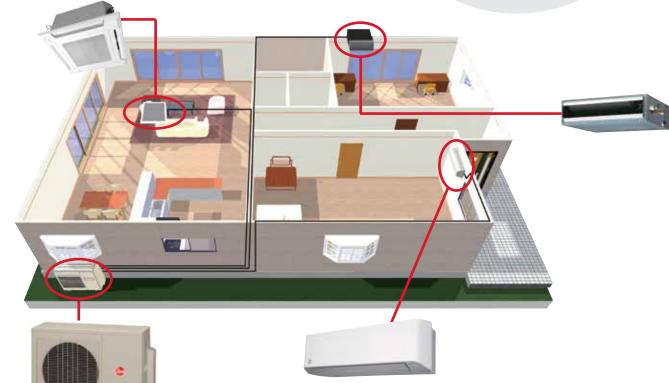

Each indoor unit can:

- Operate independently via remote control
- Supply both heating and cooling (not simultaneously)
- Provide high energy efficiencies
- Operate guietly

#### WALL MOUNTED

The mini-split indoor unit mounts high on a wall, out of sight and does not require ductwork, increasing energy efficiency.

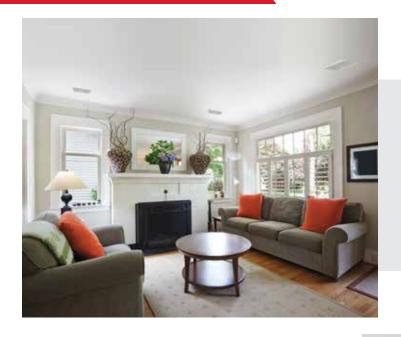

Shown here is a 3-zone mini-split system using outdoor unit ROMH36AFXZJ.

#### FEATURES

**FLOOR MOUNTED** 

like a kitchen or sunroom.

help those cold feet

• Designer wireless remote control

Floor mount systems are ideal for residential radiator

• Compact size fits easily under a standard window

• Features twin airflow for improved heat delivery and

replacements or any room with limited upper wall space,

#### **SLIM DUCT**

Mounted in a ceiling or in a framed enclosure below a ceiling. They use minimal ductwork and remain very energy efficient.

- Concealed and out of sight
- Look of central air with the efficiency of a mini-split
- Less ducts = higher efficiency

#### HEAT PUMPS PROVIDE HEAT WHEN IT'S CHILLY

Because refrigerant is naturally much colder than outdoor temperatures even on a very cold day, it actually absorbs heat from outdoors, and transfers the heat to within your home. The refrigerant's physical properties do this naturally. What you provide is the electricity to pump refrigerant via refrigerant lines from outdoors to indoors. Because it moves heat rather than creating it, it can deliver up to 4 times the heat for the energy consumed.

#### HEAT PUMPS PROVIDE COOLING WHEN IT'S WARM

Come spring and summer, simply reverse the process by putting the same system into "cooling mode" to transfer heat from indoors to the outside.

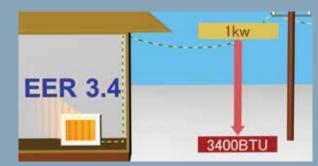

#### **COMPACT CASSETTE**

Cassettes are extremely discreet, with only the grille showing in the ceiling. They use the latest fan technology to distribute the conditioned air evenly.

- Wired remote control (wireless is optional)
- Powerful turbo fan operation
- Fits into a standard 2' x 2' ceiling grid

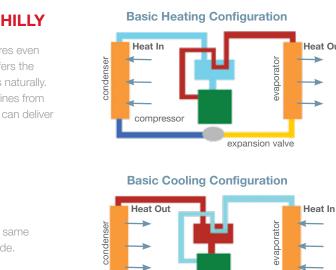

#### **ELECTRIC HEATERS VS. HEAT PUMPS**

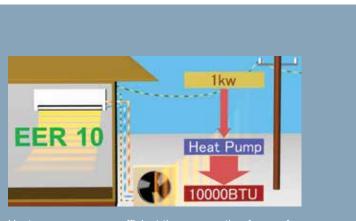

An electric heater converts electricity directly to heat, assuming that the heat loss is zero, the output from one kilowatt input is one kilowatt or 3,400 BTU/HR and the EER is 3.4.

\*EER (Energy Efficiency Rating) = Rated BTU/HR capacity divided by total kW

compres

expansion valve

Heat pumps are more efficient than some other forms of heating because they do not actually create heat—they just move it from one place to another. For example, the output of an efficient 10 EER heat pump is triple that of an electric heater at 10,000 BTU/HR.

## A SOLUTION FOR ALL OF YOUR COMFORT NEEDS

#### DUCTLESS TECHNOLOGY

Rheem® Mini-Split Systems offer a convenient alternative in areas of the home where traditional duct systems may not be an option-such as attics, home additions, basements or crawlspaces. Since mini-splits have no ducting, they set up quickly, install easily and won't take up closet or attic space. Used in conjunction with a new Rheem HVAC system, our high-efficiency ductless systems make it easy for you to keep spaces more comfortable and energy consumption low, while saving big on utility costs.

#### WHOLE HOME OR BUSINESS COMFORT

Rheem Ductless Mini-Split Systems provide home and business owners just the right amount of heating and cooling needed by installing 1 to 5 indoor units connected to one outdoor unit. Indoor units vary by size and each creates its own "zone" of comfort, allowing you to heat or cool individual rooms, hallways and open spaces.

### **A YEAR-ROUND SOLUTION**

Revolutionary heat pumps provide both heating and cooling for year round comfort in most climates. A simple push of a button on the remote control allows you to switch from heating to cooling (or vice versa) automatically.

#### Whole Home Comfort

connected to one outdoor unit. Indoor units vary by size and each creates its own "zone" of comfort, allowing the heating or cooling of

## ENERGY EFFICIENT: THE SMART CHOICE IN COMFORT

Heating and cooling consume as much as half of the energy used in your home. So, making smart decisions about your home's heating and cooling system can have a big effect on your utility bills-and your comfort.

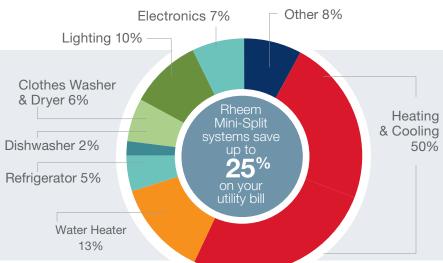

#### WHERE DOES MY MONEY GO?

The high energy efficiencies of ductless mini-split systems slash utility bills by up to 25%. If your average annual utilities are \$4,200, Rheem<sup>®</sup> can save you up to \$1,050 annually or \$10,500 over 10 years!\*

\*Savings may vary based on model selected, hours of operation and geographical location. Example given based on 33-SEER system versus 14-SEER svstem.

**ENERGY STAR® Criteria:** SEER ≥ 15.0 EER ≥ 12.5 HSF

### REBATES

To encourage customers to buy energy efficient products, many local utility companies offer significant rebates for the purchase of a ductless mini-split system. Check with your utility provider or Rheem.com/Rebates.

### **ENERGY STAR® QUALIFIED SYSTEMS**\*

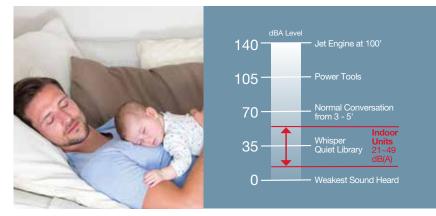

Is your HVAC equipment more than 10 years old and making your house uncomfortable? Then, call a professional HVAC contractor for an evaluation. If it is not performing efficiently or needs upgrading, consider replacing it with a unit that has earned ENERGY STAR® qualification Installed correctly, high-efficiency heating and cooling systems can save up to 25% on utility costs.

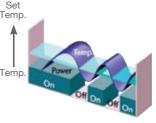

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate indoor components to meet ENERGY STAR criteria. Ask your contractor for details or visit EnergyStar.gov.

## COMFORT AND CONVENIENCE

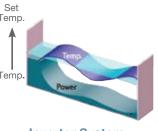

#### QUIET

Rheem<sup>®</sup> believes heating and cooling systems should be felt-not heard. Rheem Ductless Mini-Split Systems are so quiet you won't even know they're on. You can sleep well at night in a comfortable, peaceful environment. Also, our wall mount units feature Quiet Mode-extraquiet fan speed to ensure you are not disturbed.

**Conventional System** 

**Inverter System** 

#### **CONSTANT COMFORT THROUGH INVERTER TECHNOLOGY**

Inverter technology found in Rheem Mini-Splits is like cruise control for your heating or cooling system. Compressors only run as fast as they need to handle the cooling or heating demand. They can handle greater extremes in temperature, are smoother and more stable in operation, and reach the desired temperature more quickly than conventional heat pumps.

#### **Inverter Benefits**

- More heat at lower outdoor temperatures
- Lower RPMs = quieter operation
- Desired temperature in half the time
- Stable temperature

### **USER-FRIENDLY CONTROL**

## Standarc for select svsten

### **APPLICATIONS**

Convenience stores Fast food chains Fire houses Police stations Oil rigs Bars Warehouses Small offices Older homes Schools facilities Restaurants Hotels and motels Car washes ATM vestibules

Sunrooms and additions New construction homes Hospitals and medical

### Where can **Rheem® Mini-Splits** be used?

### Just about any place that requires comfort!

## LOW TEMPERATURE HEATING OPERATION

### NOT ALL HEATING SYSTEMS ARE CREATED EQUAL Without the right technology, a system won't work when its needed most.

#### **PROTECTION FROM WINTER'S COLDEST TEMPERATURES**

When the temperature drops you don't want to be left in the cold. It's important to choose a heat pump system rated for the climate you live in. If your system doesn't operate in severe conditions you and your family could be left without any heat at all.

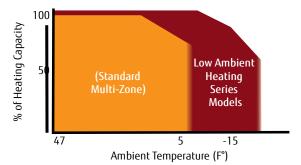

Rheem's line of mini-split heat pumps come in different sizes, styles, and rated outdoor temperatures. The Low Temperature Heating Operation Series features outdoor condensing units engineered to operate in temperatures down to -15°F.

Without the right technology, condensate freezes to the bottom of the unit and reduces its efficiency and heating output.

#### **IMPROVED HEATING CAPACITY**

Heating capacity at low outdoor temperatures was improved by adopting a large heat exchanger and a high capacity compressor.

#### HIGH PERFORMANCE HEATING

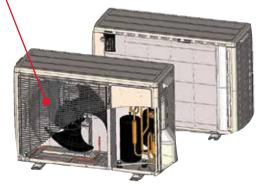

Rheem<sup>®</sup> low temperature heating operation units feature large heat exchangers and high capacity compressors. This gives our low temperature heating operation heat pumps the ability to extract heat even at very low outdoor temperatures. For example, at an indoor setpoint of 70°F, all AHHJ and AFFHJ models can deliver 100% or more of their rated heating capacity down to 3°F. All low temperature heating operation models also offer superior heating performance down to -15°F outdoor temperatures.

Rheem Low Temperature Heating Operation systems do not have a low temperature lockout, continuing to heat even below -15°F as conditions allow.

### **METAL FAN GUARD**

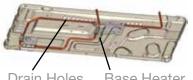

While other models have a plastic fan guard, Low Temperature Heating Operation models use metal, which is most capable of withstanding the colder elements

#### **BASE PAN HEATER**

• Equipped with a heater that prevents condensate from freezing

- Contoured base design discharges melted water through drain holes.
- Without a heater, freezing condensate can cause noise, damage to fan blade, condenser, and system performance.

Base Heater Drain Holes

### FEATURE EXPLANATION **ENERGY SAVING**

Seasonal Energy Efficiency Rating. Used to express efficiency of an AC or heat pump. A higher rating means more efficient.

#### HSPI

Heating Seasonal Performance Factor, measures the efficiency of heating portion of your heat pump.

#### conomy Mode

Thermostat setting automatically changes according to the temperature to avoid unnecessary cooling and heating.

#### nergy Saver

Keeps room cool enough for comfort by using a relaxed thermostat setting reducing power consumption.

#### Energy Saving Program (ESP)

If a space is left without turning the unit off, ESP knows that it is unoccupied and 20 minutes later, temperature is adjusted accordingly until users return to the room. Function is disable in multi-zone installations.

#### ENERGY STAR® Qualified

Qualified products and practices help you save money and reduce greenhouse gas emissions by meeting strict energy efficiency guidelines set by the U.S. Environmental Protection Agency and the U.S. Department of Energy.

#### Minimum Heat Mode

Sets room temperature to 50°F, keeping temperatures above freezing and reducing power consumption.

#### COMFORT

#### Auto Changeover (heating to cooling or vice-versa)\*

Automatically alternates between heating or cooling if the room temperature falls 4°F below the set temperature when cooling or rises 4°F above set temperature when heating.

#### Auto Fan Mode

System starts in high fan speed and automatically adjusts downward as room begins to reach set temperature.

#### Redirects airflow automatically with up / down and left / right motion.

Auto Louver: Up / Down

Redirects airflow automatically with seven position up and down motion which can be set to auto swing.

#### Auto Restar

Following a power failure, systems will automatically restart in the same operating mode as before, once power has been restored.

This mode gives priority to reducing the level of humidity in the room, in conjunction with lowering the temperature.

#### Fresh Air Intake

Outside air can be introduced by attaching field supplied flexible duct to fresh air knockouts

#### Outdoor Unit Low Noise+

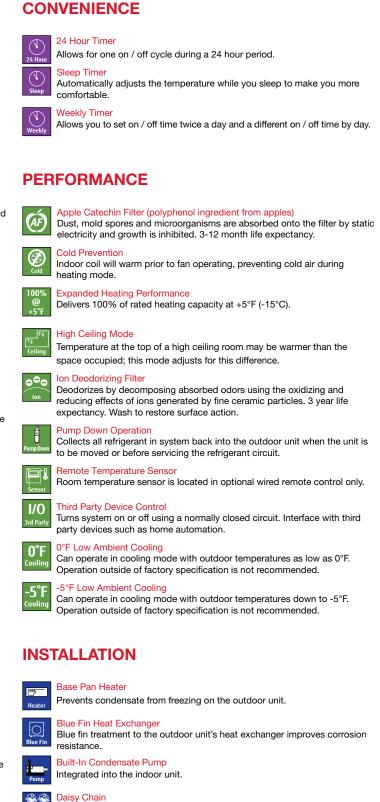

Limits compressor and fan speed during high speed operation for noise reduction purposes.

#### Powerful Operation

20 minutes of continuous operation at maximum airflow and maximum compressor speed. Rapid cooling and heating makes the room comfortable quickly

#### Quiet Mode (Indoor Unit) An extra quiet fan speed to make sure you are not disturbed.

- + Function is bypassed during defrost and at low speed operation. This feature may limit cooling /heating capacity during high / low ambient conditions and increase energy consumption as system may need to operate longer due to reduced compressor speed.
- Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is <u>not</u> recommended for systems with nore than one indoor unit <u>unless</u> all indoor units have similar heating and cooling requirement and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.

16

Ability to connect up to 16 identical style indoor units to one wired remote.

#### 164+ ft Pinin

ona Pipina Lenath Long piping lengths between indoor and outdoor units provides flexibility and increased applications.

Slender Fit Cassette body can be moved downward into the room 1-3/8" to accommodate limited ceiling space.

14

Available only with optional wireless remote control.
 Available only with optional Fresh Air Intake Kit.
 Constrained and On / Off control only.
 See bottom of Page 17 for qualifying combinations.
 Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one timotor unit <u>unless</u> all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.
 'Standard warranty is 5 year Parts / 7 year Compressor. Warranty will be extended to a period of ten (10) years under specific conditions and online registration is required (registermyunit.com) For Complete details, contact your local Contractor, or go to Rheem.com for a copy of the product

### SINGLE-ZONE DUCTLESS MINI-SPLIT SYSTEMS Making the hottest places cool and the coolest places more comfortable

Extensive lineup from 9,000 to 48,000 BTU

- · 38 different systems available in 7 indoor unit styles
- Energy efficient systems with SEER ratings as high as 33.0 and HSPF as high as 14.2
- 26 ENERGY STAR<sup>®</sup> qualified systems

- Inverter Technology is used in all systems
- All systems feature environmentally friendly R410A refrigerant
- · Quiet operation with indoor units as low as 21dB and outdoor units as low as 47dB

### 9, 12, 15,000 BTU/HR WALL MOUNT HEAT PUMPS

<sup>2</sup>Available only with optional interface kit. Operation monitoring and On / Off control only. <sup>3</sup>Low temperature heating operation models only

#### **ENERGY SAVING PROGRAM**

These Rheem<sup>®</sup> systems know how to save you money even when you forget. If you leave the room without turning the unit off, ESP knows that you left and 20 minutes later, set temperature is increased by 4°F when cooling and reduced by 8°F when heating. When you come back to

the room, it returns to previous operating mode. This prevents wasteful operation to save energy without you having to think about it. This feature can be deactivated if chosen.

#### **HIGH PERFORMANCE HEATING**

The AHWJ model can operate down to -5°F. The AHHJ can operate down to -15°F. See the full low temperature heating operation story on page 12.

#### **OPTIONAL ACCESSORIES**

- Wired Remote Control: RXRVNUM
- Wired Remote Control: RXRNNUM
- Simple Remote Control: RXRSNUM
- Interface Kit: RXTWBXF1
- Dry Contact Wire Kit: RXXWZXZ5

### LOW TEMP HEATING SYSTEMS 09AHHJ, 12AHHJ, 15AHHJ

## 9 AND 12,000 BTU/HR WALL MOUNT HEAT PUMPS

<sup>1</sup>Available only with optional wired remote control. <sup>2</sup>Available only with optional wired remote control and optional interface kit. <sup>3</sup>Available only with optional interface kit. Operation monitoring and On / Off control only.

#### **BUILT IN FILTRATION**

**OOO** Ion

#### LONG-LIFE ION DEODORIZATION FILTER

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine particle ceramic. The filter can be used for approximately 3 years if it is washed with water when dirty to restore its surface action.

#### APPLE CATECHIN FILTER

ÁF Dust, mold spores and micro-organisms are absorbed onto the filter by static electricity and growth is inhibited and deactivated. Filter lasts 3-12 months.

## Ion Deodorization Filter Apple-catechin Filter Air Filter 3

#### **OPTIONAL ACCESSORIES**

- Wired Remote Control: RXRVNUM\*
- Wired Remote Control: RXRNNUM\*
- Simple Remote Control: RXRSNUM\*
- Dry Contact Wire Kit: RXXWZXZ5
- Interface Kit: RXXCBXZ2

\*Wall mounted RIWH09, 12AVFJ require accessory interface kit #RXXCBXZ2 in order to connect these devices to them.

### 18 AND 24,000 BTU/HR WALL MOUNT HEAT PUMPS

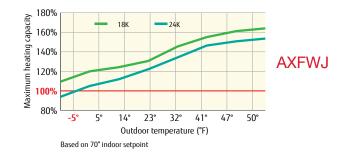

<sup>1</sup>AXFWJ systems only. <sup>2</sup>AXFWJ systems require optional wired remote control. <sup>3</sup>Available only with optional wired remote control.

#### HIGH PERFORMANCE HEATING CAPACITY

Stay comfortable at low ambient temperatures! The AXFWJ systems can deliver 100% or more of rated heating capacity at 5°F (-15°C) and operates down to -5°F (-21°C).

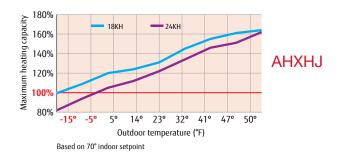

The AHXHJ model can operate down to -15°F. See the full Low Temperature Heating Operation story on page 12.

<sup>4</sup>Available only with optional Interface kit. Operation monitoring and On / Off control only. <sup>5</sup>AHXHJ models only.

#### **OPTIONAL ACCESSORIES**

- Wired Remote Control: RXRVNUM
- Wired Remote Control: RXRNNUM
- Simple Remote Control: RXRSNUM
- Dry Contact Wire Kit: RXXWZX

## 30,000 BTU/HR WALL MOUNT HEAT PUMP

<sup>1</sup>Available only with optional wired remote control. <sup>2</sup>Available only with optional Interface kit.

#### **EXTENDED LINESET**

Long piping lengths between indoor and outdoor units provides flexibility and increased applications.

#### SERVER ROOM MODE

Server rooms can generate a tremendous amount of heat, and require cooling 24 hours a day. The strain of such a heat load is best handled with a redundant cooling system. Pairing two 30AHXHJ systems together in Server Room Mode offers a unique solution for keeping network servers cool.

Two 30AHXHJ systems can be set up to work together in Lead Lag^ operation:

- Alternative Operation units alternate operation, so neither unit is running at the same time.
- Backup Operation if an error occurs on one unit, the second unit will turn on.
- Supporting Operation if the setpoint cannot be reached with one unit alone, the second unit will come on to satisfy the demand for cooling.
- ^ Wired remotes cannot be used when using this feature. This includes RXRNRUZ1, RXRVNUM, RXRNNUM, RXRSNUM.

#### LOCK OUT FUNCTION

This feature is set by the contractor on behalf of the Commercial Property Owner to prevent either Cooling or Heating operation from occurring. This is not a function that can be set by a tenant, user, or homeowner

#### **HIGH PERFORMANCE HEATING CAPACITY**

The AHXHJ model can operate down to -15°F. See the full Low Temperature Heating Operation story on page 12.

#### ADDITIONAL APPLICATIONS THAT MAY **REQUIRE LOW AMBIENT COOLING**

- Conference / Meeting / Training Rooms
- Social Gathering Spots
- Places of Worship

#### **OPTIONAL ACCESSORIES**

- Wired Touch Panel Remote Controller: RXRNRUZ2^
- Wired Remote Control: RXRVNUM^
- Wired Remote Control: RXRNNUM^
- Simple Remote Control: RXRSNUM^
- Dry Contact Wire Kit: RXXWZX
- Interface Kit: RXXCSXZ1
- Interface Kit Box: RXGXXB
- Outdoor Unit Input / Output Connector: RXXWZXZ3

The 30AHXHJ is specially engineered for applications that require constant cool temperatures year round, and / or rooms with large heat loads such as classrooms and conference rooms.

### 9 AND 12,000 BTU/HR, 115V, WALL MOUNT HEAT PUMPS

#### **FUNCTION**

for single rooms. Indoor units have a clean, aesthetic design and are small but mighty and shorter in length than competing units, helping them blend into any room.

#### **EASY MAINTENANCE**

Front panel is easily removed for cleaning.

#### **APPLICATIONS**

Stylish, slim and elegant, these popular wall mounted units are designed This category of equipment is ideal for smaller spaces where spot cooling or heating is required. Residential applications including sunrooms and additions are made easier with these 115 volt heat pumps. Do you have a warm or cool spot in your home? Rheem® Mini-Splits can provide extra cooling or heating capacity for those hard to cool areas. Commercially, their small size makes them ideal for small offices, providing individual temperature control.

### SYSTEMS 09AVSA, 12AVSA

## 18, 24, 30, 36,000 BTU/HR WALL MOUNT HEAT PUMPS

ROSH18ASJ ROSH24ASJ

<sup>1</sup>Available only with optional wired remote control. <sup>2</sup>Available only with optional Interface kit. <sup>3</sup>AXJ models only.

### **FUNCTION**

Stylish, slim and elegant, these wall mounted ductless heat pumps are designed for single rooms. Ideal for spaces requiring additional capacity but are limited on space. With more efficient zone control, ductless mini-splits are perfect for renovations, restorations, conversions, and add-ons.

#### **OPTIONAL ACCESSORIES**

- Wired Remote Control: RXRVNUM
- Wired Remote Control: RXRNNUM
- Simple Remote Control: RXRSNUM
- Dry Contact Wire Kit: RXXWZX

### LOCK OUT FUNCTION

This feature is set by the contractor on behalf of the Commercial Property Owner to prevent either Cooling or Heating operation from occurring. This is not a function that can be set by a tenant, user, or homeowner.

### SYSTEMS 18ASJ, 24ASJ, 30AXJ, 36AXJ

## 9, 12, 15,000 BTU/HR FLOOR MOUNT HEAT PUMPS

 $^{1}\mbox{Available}$  with optional wired remote control.  $^{2}\mbox{AFFHJ}$  models only.

#### **IDEAL RADIATOR REPLACEMENT**

At less than 24" high and 30" wide, floor mount models fit easily under a standard window and can replace a radiator twice its size while producing more capacity.

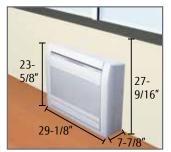

#### **TWO FANS AND WIDE AIRFLOW**

Having both upper and lower airflow quickly warms or cools the entire room. Floor mount can be set in "Upward Airflow Only" when occupants wish not to have feet warmed or cooled.

#### FLEXIBLE AND EASY INSTALLATION

Beneath standard window

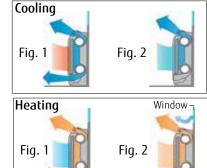

### **BASE PAN HEATER (AFFHJ MODELS)**

AFFJ models can operate down to -5°F. AFFHJ models can operate down to -15°F. See the full Low Temperature Heating Operation story on page 12.

#### **OPTIONAL ACCESSORIES**

- Wired Remote Control: RXRVNUM
- Wired Remote Controller: RXRNNUM
- Simple Remote Control: RXRSNUM
- Dry Contact Wire Kit: RXXWZXZ5

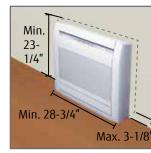

Wall

Max. 5-7/8"

. Upon startup, both top and bottom louvers open. . As the room temperature nears the setpoint, only the top louver stays open to help prevent cold air from falling.

 Upon startup, both top and bottom louvers open.
 Closer to setpoint, only the top louver stays open to help prevent cold drafts from windows.

Half concealed\*

\*Field supplied insulation required

### 9,12,18,000 BTU/HR COMPACT CASSETTE HEAT PUMPS

#### **Compact Cassette** State B Grille RXCCGF shown is sold separately 0 and must be ordered with each compact cassette model. St# Weekly R ♦ ♠ ♠ ↓↓↓ Dry (())

<sup>2</sup>Requires Rheem's Optional Fresh Air Kit part #RXVXAA. Allows for a 4-inch flex duct connection. Requires a field supplied duct booster fan capable of 60 CFM at .2" W.C. or 90 CFM at .4" W.C. For fan static pressure requirements, see installation manual. Add hood, filter and duct losses for fan total static pressure requirements. Will add 4" to the height of the indoor unit.

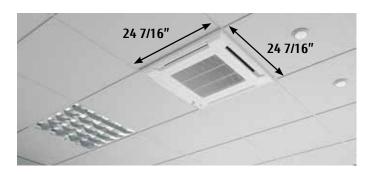

<sup>3</sup>Available only with optional Interface kit. Operation monitoring and On / Off control only.

#### **FUNCTION**

Compact cassettes provide comfort cooling or heating for small room applications. Features include high efficiency up to 24.0 SEER, heating at low temperatures down to -5°F, compact design, quiet operation, a standard wired remote control, and the ability to bring in fresh air through the optional Fresh Air Kit.

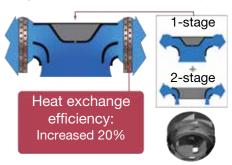

#### **EASY INSTALLATION**

Fits into a standard ceiling tile\*.

#### 2-STAGE TURBO FAN

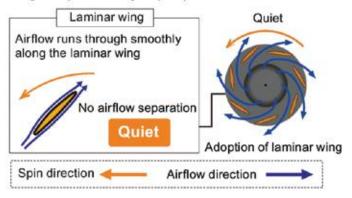

Air distribution is evenly spread across the heat exchanger by the 2-stage turbo fan which produces two separate airflow streams.

#### **QUIET OPERATION**

Optimization of wing form (laminar wing design) and number of wings (7 blades) enables as low as 27 dB.

#### Designed by CFD-analysis (fluid) simulations

#### **OPTIONAL ACCESSORIES**

- Wired Remote Control: RXRVNUM
- Wireless Remote: RXLNHUM

• Fresh Air Kits: RXVXAA Mixes room air which then passes through the heat exchanger.

## 9, 12, 18,000 BTU/HR SLIM DUCT HEAT PUMPS

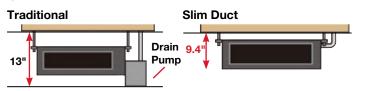

Available only with optional wireless remote control. Available only with optional Interface kit. Operation monitoring and On / Off control only.

### **FLEXIBLE INSTALLATION**

Slim ducts provide cooling or heating for small room applications such as offices, restaurants, convenience stores, motels, dorms, in retrofit and will not operate when the unit is mounted in a vertical configuration. new construction. Long maximum combined piping length of 66' and 49' in height allow for versatile installations. Either horizontal or vertical flexibility and low height enables compact soffit or cabinet installation.

#### **SLIM DUCT**

Built-in drain pump allows for installation of slim duct unit in smaller spaces than traditional units.

#### **RETURN AIR-INTAKE CHOICES**

Unit can be placed horizontally or vertically. However, internal drain pump

### **OPTIONAL ACCESSORIES**

- Wired Remote Control: RXRVNUM
- Wireless Remote and Receiver: RXLRHUM
- Auto Louver Grille Kit: RXGXSA-W (for RIDH07/09/12) and RXGXSB-W (for RIDH18)

#### FIELD SUPPLIED FILTERS USED WITH SLIM DUCT UNITS

Although Slim Duct units come with factory filters, when return ductwork is used field supplied filters are more practical to use. They can be installed at the unit or for more convenient servicing, in filter grilles. See the guidelines to the right to determine filter sizes.

The chart includes CFM, external static pressure capability and a typical filter size for each model. Filters are sized to keep velocities and static pressure loss low. This will ensure sufficient static pressure is available for ductwork, fittings and supply and return grilles.

Alternative filter sizes with equivalent face areas can be used. After deducting filter loss, available static pressure values are shown.

shown in white.

A fiberglass filter is shown in blue

to the left. A MERV pleated filter is

### SLIM DUCT HEAT PUMP SYSTEMS 09AFCJ, 12AFCJ, 18AFCJ

## 18, 24, 36,000 BTU/HR CEILING & UNIVERSAL HEAT PUMPS

<sup>1</sup>Available only with optional wired remote control. <sup>2</sup>Fresh air knockout available. Fresh air fan and ductwork field supplied. See Design and Technical Manual for details.

#### **APPLICATIONS**

The universal floor/ceiling mount 18AXJ and 24AXJ are ideal for a house of worship to mount beneath stained glass windows. Lower in height than the pews, they do not disturb the aesthetics of the space. With long piping lengths of 165' the outdoor units can also be placed remotely out of sight. Another popular application for this model is in hallways where wall space is limited. The 36ASXJ is popular where fresh air intake and high capacity is required like a restaurant or bar. They are also often suspended from threaded rod and used in multiple to condition large warehouse spaces.

#### **FUNCTION**

The 18AXJ and the 24AXJ are universal mount. They can mount low on the wall or transverse mount them on the ceiling. The 36ASXJ can only be mounted on the ceiling, can take in fresh air and can throw air farther.

#### **OPTIONAL ACCESSORIES**

- Wired Remote Control RXRNBYU\*
- Weekly Timer
- Full Function Wired Remote
- Child Lock Capable
- Condensate Pump RXDPB24T
- OEM design plug and play
- Rated for 11.8" of vertical lift
- Available only for System 36ASXJ

\*Requires dip switch change on indoor unit.

### SYSTEMS 18AXJ, 24AXJ, 36ASXJ

### 18, 24, 30, 36, 42,000 BTUh LARGE CASSETTE **CIRCULAR FLOW HEAT PUMPS**

<sup>2</sup>42, 48,000 BTUh systems only. <sup>3</sup>Available only with optional wireless remote control.

#### **BETTER AIR DISTRIBUTION USING 360-DEGREE LOUVERS**

Circular flow design allows conditioned air to reach every corner of a room.

#### INDIVIDUAL LOUVER CONTROL

Each louver can be set individually to deliver comfortable air exactly where you want it in any room configuration. To take advantage of this feature use Wired Remote Control (Touch Panel) RXRNRUZ2.

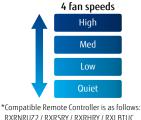

Individual louvers can be programmed separately. Adjust vertical airflow and louver position with RXRNRUZ2 Wired Remote Control.

Airflow fan speed can be customized depending on room layout.

#### **QUIET OPERATION AND 4 FAN SPEED** CONTROL

With the new airflow structure, sound levels are drastically reduced. Circular flow cassette models operate at whisper quiet sound levels. Choose from 4 different fan speeds.

24k BTUh model (Cooling/High)

35dB(A)

\*Compatible Remote Controller is as follows

Available only with optional wired remote control

<sup>5</sup>Available only with optional Interface kit. Operation monitoring and On/Off control

#### **HIGH ENERGY EFFICIENCY**

Energy saving performance is achieved by DC twin rotary compressor, DC fan motor and optimal refrigerant cycle control.

18,000 BTUh and 24,000 BTUh models are Energy Star aualified.

#### **RECOMMENDED ACCESSORIES**

NOTE: RGLX Large Cassette grilles are sold separately.

#### **NOTE: Wired Remote Control sold separately.**

RXGCGF

ACXJ Large Cassettes are compatible with RXRNRUZ2 2-wire controls.

## SYSTEMS

### 18AXCJC, 24AXCJC, 30AXCJC, 36AXCJC, 42AXCJC, 48AXCJC

## MULTI-ZONE MINI-SPLIT SYSTEMS

#### ROMH18AFXZJ, ROMH24AFXZJ, ROMH36AFXZJ, ROMH45AFXZJ

- Operate as few as one indoor unit or all indoor units
- Choose from 4 indoor unit styles wall mount, slim duct, compact cassette, and floor mount
- Create hundreds of combinations based on indoor type and BTU/HR
- Connect 2 to 5 indoor units, depending on model
- Connect 14,000 to 54,000 BTU/HR
- No branch boxes or separation tubes required
- A Tri-Zone 24,000 BTU Unit Rheem<sup>®</sup> offers a 2-ton system that provides 2- or 3-zone flexibility. By using connectable capacity, this system allows up to three 9,000 BTU units.
- Pricing Compared to Competition Additional outdoor units provides better matched BTU capacity with indoor units. By better matching the outdoor unit to the indoor capacity a better system value is achieved.

#### MULTI-ZONE LOW TEMPERATURE HEATING

- Connect 2 to 4 indoor units, depending on model
- Connect 14,000 to 39,000 BTU
- Low Temp Heating down to -15°F outdoor temps
- No branch boxes or separation tubes required

#### MULTI-ZONE MINI-SPLITS

## YEAR-ROUND, WHOLE HOME OR BUSINESS COMFORT

Ductless systems are one of today's most advanced forms of heating and cooling. Multi-zone outdoor units can operate from 2 to 5 indoor units simultaneously. Rheem® Mini-Split systems are super quiet as well as highly energy efficient.

Shown to the right is outdoor model ROMH36AFXZJ connected to three wall mount indoor units.

#### MULTI-ZONE SYSTEMS 18,000, 24,000, 36,000, AND 45,000 BTU/HR

#### **Connectable Capacity**

This allows connectable indoor units' total capacity to exceed outdoor unit capacity. See Allowable Combination table on page 50.

If all indoor units are cooling or heating at the same time, the system will limit their capacity so that their total matches the outdoor unit's capacity. When a zone meets a desired set temperature it requires less capacity. The unused capacity is then distributed to the remaining indoor units, increasing their capacity.

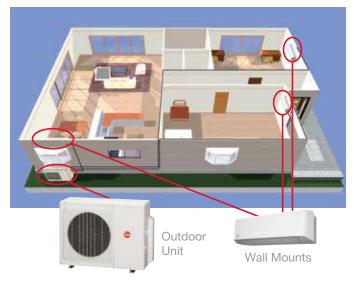

### **MIX AND MATCH FLEXIBILITY**

The ability to create the right combinations, the right quantity (up to 5-zones), the right style indoor units, and the right capacity. It's the **RIGHT** choice for your home or business.

#### EFFICIENT **INSTALLATION EXAMPLE**

The load on a 3-bedroom home with a living to occupied spaces. This can be achieved by our ROMH36AFXZJ outdoor unit.

### INDIVIDUAL ZONING: PERSONALIZED WHOLE HOME COMFORT

#### WALL MOUNTED

They mount high on a wall, out of sight and do not require ductwork, increasing energy efficiency.

- Quiet operation
- Easy maintenance
- High delivered efficiency means lower utility bills

### **COMPACT CASSETTE**

Cassettes are extremely discreet, with only the grille showing in the ceiling. They use the latest fan technology to distribute the conditioned air evenly.

- Wired remote control (wireless is optional)
- Powerful turbo fan operation
- Fits into a standard 2' x 2' ceiling grid

### **SLIM DUCT**

Mounted in a ceiling or in a framed enclosure below a ceiling. They use minimal ductwork and remain very energy efficient.

- Concealed and out of sight
- Look of central air with the efficiency of a mini-split
- Less ducts = higher efficiency

#### **FLOOR MOUNTED**

Floor mount systems are ideal for residential radiator replacements or any room with limited upper wall space, like a kitchen or

- Compact size fits easily under a standard window
- Features twin airflow for improved heat delivery
- Designer wireless remote control

## 7, 9, 12, 15, 18, 24,000 BTU/HR WALL MOUNT

**MULTI-ZONE INDOOR** 

RIWH07, 09, 12, 15AVFJ

RIWH18, 24AVFJ

<sup>1</sup>Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one indoor unit unless all indoor units have similar heating and cooling requirements and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.

<sup>2</sup>RIWH18,24AVFJ models only. <sup>3</sup>RIWH07,09,12,12AVFJ models only. <sup>4</sup>RIWH07,09,12,12AVFJ models: Available only with optional wired remote control. <sup>5</sup>Available only with optional wired remote control and optional interface kit. <sup>6</sup>Available only with optional interface kit.

#### **BUILT IN FILTRATION**

#### LONG-LIFE ION DEODORIZATION FILTER

The filter deodorizes by powerfully

ions generated by the ultra-fine-particle ceramic. The filter can be used for approximately 3 years if it is washed with water when dirty to restore its surface action.

Dust, mold spores and micro-organisms are

#### decomposing absorbed odors using the oxidizing and reducing effects of absorbed onto the filter by static electricity and growth is inhibited and deactivated.

## 7, 9, 12, 18, 24,000 BTU/HR SLIM DUCT

**MULTI-ZONE INDOOR** 

<sup>1</sup>Available only with optional wireless remote control.

<sup>2</sup>Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one indoor unit unless all indoor units have similar heating and cooling requirements and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.

<sup>3</sup>Availabe only with optional interface kit.

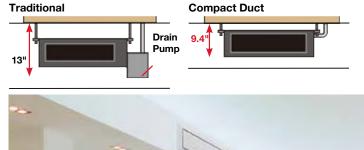

#### **FLEXIBLE INSTALLATION**

Horizontal or vertical, though internal drain pump will not operate when the unit is mounted in a vertical configuration.

#### **SLIM DUCT**

Adaptable when ceiling cavity is small and there is no slope for drain.

## 7, 9, 12, 18,000 BTU/HR COMPACT CASSETTES

**MULTI-ZONE INDOOR** 

**Compact Cassette** Grille RXCCGF shown is sold separately and must be ordered with each compact cassette model.

<sup>1</sup>Available only with optional wireless remote contro

<sup>2</sup>Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one indoor unit unless all indoor units have similar heating and cooling requirements and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.

<sup>3</sup>Requires Rheem's Optional Fresh Air Kit part #RXVXAA. Allows for a 4-inch flex duct connection. Requires a field supplied duct booster fan capable of 60 CFM at .2" W.C. or 90 CFM at .4" W.C. For fan static pressure requirements, see installation manual. Add hood, filter and duct losses for fan total static pressure requirements. Will add 4" to the height of the indoor unit.

<sup>4</sup>Available only with optional Interface kit. Operation monitoring and On / Off control only.

#### **EASY MAINTENANCE**

Maintenance is made simple by removing the ceiling panel next to the grille. Working on the cassette unit from an adjoining ceiling tile keeps disruption and construction costs down.

#### **2-STAGE TURBO FAN**

Air distribution is evenly spread across the heat exchanger by the 2-stage turbo fan which produces two separate airflow streams.

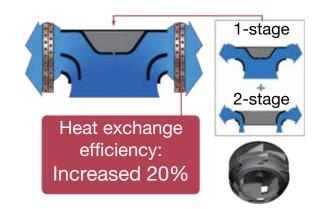

RXVXAA

Mixes room air then passes through the heat exchanger.

9, 12, 15,000 BTU/HR FLOOR MOUNT

MULTI-ZONE INDOOR

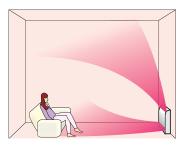

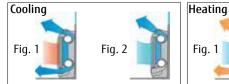

<sup>1</sup>Available with optional wired remote control. <sup>2</sup>Available only with optional Interface kit. Operation monitoring and On / Off control only.

#### 2-FAN AND WIDE AIRFLOW

Having both upper and lower airflow quickly warms or cools the entire room. Floor mount can be set in "Upward Airflow Only" when occupants wish not to have feet warmed or cooled.

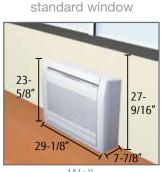

- 1. Upon startup, both top and bottom louvers open.
- only the top louver stays open to help prevent cold air from falling.
- 1. Upon startup, both top and bottom louvers open. 2. As the room temperature nears the setpoint, 2. Closer to setpoint, only the top louver stays

## 18, 24, 36, 45,000 BTU/HR MULTI-ZONE OUTDOOR UNITS

Outdoor unit

Contractors can select either an 18, 24, 36 or 45,000 BTU/HR outdoor unit combined with wall mounted, slim duct, compact cassette or floor mount type indoor units. Mix-and-match flexibility of evaporator type and capacity allows you to choose the indoor unit that best fits the application, whether it be hidden or showcased. These systems are ideal for nursing homes, doctor's offices, condominiums, apartments and

residences—any place where individual cooling or heating is needed.

#### **DC TWIN ROTARY COMPRESSOR**

A high performance, low noise, large capacity DC twin rotary compressor is used.

ROMH18, 24AFXJ

### **COMPACT SIZE**

The compact size of the outdoor units allows for many installation opportunities.

**SERVICE VALVES** 

ROM18FXZHJ / ROM24FXZHJ

The above units have service valves.

BENEFITS:

- Installation It allows for a guicker and more productive install.
- Service Allows for isolation.
- Add Ons Ease of additional add-ons.

The ROM36FXZHJ does not have this feature.

## ROMH18AFXZJ, ROMH24AFXZJ, ROMH36AFXZJ, ROMH45AFXZJ

<sup>1</sup>18+18 is the only 2 indoor unit (RIWH, RIDH or RICH) combination and requires K9FZ1818 <sup>2</sup>See table for allowed combinations within this connectable capacity range.

### 18, 24, 36,000 BTUh LOW TEMPERATURE HEAT MULTI-ZONE OUTDOOR UNITS

#### **AMBIENT HEATING TEMPERATURE OF -15°F**

Other models may go as low as -5°F, however they do not include a base heater and other advancements found in Low Temperature Heat models. See the full story on page 12.

> The base of Rheem's Low Temperature Heat outdoor condensing units.

Base Heater

When temperatures reach 36°F, a built-in heater warms the base of the outdoor unit so that condensation doesn't freeze. Without a heater, freezing condensate can cause noise, damage to the fan blade, condenser, and system performance.

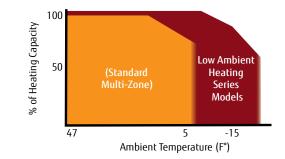

18, 24,000 BTUh

36,000 BTUh

#### **IMPROVED HEATING CAPACITY**

Heating capacity at low outdoor temperatures was improved by adopting a large heat exchanger and a high capacity compressor.

#### **SERVICE VALVES**

ROM18FXZHJ / ROM24FXZHJ

The above units have service valves.

BENEFITS:

- Installation It allows for a quicker and more productive install.
- Service Allows for isolation.
- Add Ons Ease of additional add-ons.

The ROM36FXZHJ does not have this feature.

### **CHOOSE AN OUTDOOR UNIT:**

Select either an 18, 24, 36 or 45,000 BTUh outdoor unit combined with wall mounted, slim duct, compact cas units. Mix-and-match flexibility of evaporator type and capacity allows you to choose the indoor unit that best fits the application, whether it be hidden or showcased.

"+" represents available circuit for future expansion when connecting this combination. \*The optional kit RXK9FZ1818 is necessary for dual zone system "18+18" with ROMH36AFXZJ only. AWall mounted type RIWH18AFVJ cannot be connected in this combination using ROMH36AFXZJ. Combination allowed with ROMH36FXHJ. <sup>(</sup>Actual rated cooling capacity of RIWH15AVFJ is 14,000 BTU/h.

<sup>1</sup>If using RXRNBYU with these models you need to change the dip switch SW-1 to "ON". Refer to Tech Tip #028. <sup>2</sup>Wall mounted RIWH09, 12, and 15RAHWJ / AHHJ require accessory interface kit #RXTWBXF1 in order to connect these devices to them.

<sup>3</sup>Wall mounted RIWH07, 09, and 12AVFJ require accessory interface kit #RXXCBXZ2 in order to connect

4 Construction of the second se

<sup>s</sup>Requires RXWIFI. <sup>®</sup>Wireless Receiver #RXLRHUM is required in order to connect this device. <sup>7</sup>Requires accessory interface kit #RXXCBX22 <u>and</u> plug model #RXWIFI in order to connect these devices to them. #Requires accessory interface kit #RXTWBXF1 <u>and</u> plug model #RXWIFI in order to connect these devices to them.

#### ACCESSORIES

#### ACCESSORIES

#### CONTROLS

#### Wired Remote Control RXRNNUM\* RXRNBYU^ 3-Wire

The wired remote control with its unique lock function and sleek design provides full feature access to property managers, building owners, and facility maintenance, as well as providing basic comfort features to tenants, employees, and teachers.

#### Simple Remote Control 2-Wire Group RXRSRY Control

Backlit 2-wire remote with built in temperature sensor. Offers

set point adjustment in 1°F increments. Concentrates on basic functions such as Start/Stop, fan control, temperature setting and operation mode.

#### Wireless Remote Control **RXLNHUM**

For spaces where there is just no place to mount the wired remote or where wireless operation is preferred.

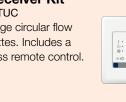

#### **Receiver Unit RXLRHUM**

3-Wire

For slim duct models. Includes a wireless remote control

#### **IR Receiver Kit** RXLBTUC For large circular flow cassettes. Includes a wireless remote control.

Simple Remote Control 2-Wire Group RXRHRY

Backlit 2-wire remote with built in temperature sensor. Offers set point adjustment in 1°F increments. Concentrates on basic functions such as Start/Stop, fan control, and

individual indoor units. Set temperatures on timers to best meet individuals needs. Includes a large backlit LCD and 4-way navigation pad. Remote connects in daisy chain to branch boxes.

#### Simple Remote Control RXRSNUM 3-Wire

Suitable when only basic operations are required for hotels, offices and other places where there is frequent arrival and departure of occupants. Remote does not allow any timer settings.

#### Wired Remote (Touch Panel) RXRNRUZ2

Features a large backlit LCD display and displays the room temperature. Provides full feature access to property managers, building owners, and facility maintenance, as well as providing basic comfort features to tenants, employees, and teachers.

Replaces room temperature sensor in the return when installed while still allowing for temperature correction.

#### **ADDITIONAL CONTROLS**

#### **Thermostat Converter** RXTTRX

Control products1 using a third party thermostat. Up to 16 indoor units can be connected as a group to one thermostat convertor.

Group Control: With this feature, multiple evaporators can be 'daisy-chained' together on one single remote control, allowing for multiple single-zoned systems installed in an application to be grouped together by evaporator. The same feature can be used on a multi-zone system however, multiple multi-zone systems cannot be grouped together nor can a single-zone system be group controlled with a multi-zone system.

^Minimum Heat, Sleep Timer functions will be lost when the wired remote control is installed.

\*Wall mounted RIWH07, 09, and 12AFVJ require accessory interface kit (Part RXXCBXZ2) in order to connect this device to them. Wall mounted RIWH09, 12, and 15AHWJ / AHHJ require accessory interface kit (Part RXTWBXF1) in order to connect this device to them.

#### FRESH AIR INTAKE KITS

Air Outlet Shutter Plate RXYDZK

Installed at the air outlet when 3-directions mode is performed.

#### Fresh Air Intake Kit

RXVXAA - for compact cassette units Mixes room air then passes it through a heat exchanger. Allows for a 4-inch flex duct connection. Requires a field supplied duct booster fan capable of 60 CFM at .2" W.C. or 90 CFM at .4" W.C. For fan static pressure requirements, see installation manual.

#### **High Humidity Insulation** Kit

RXKXGC Additional insulation for compact cassette units, which may be needed when they are installed in high humidity areas.

#### **Air Outlet Shutter Plate**

RXYDZB In a 3-way air flow configuration an Air Outlet Shutter Plate kit is required to block air flow of 1 louver.

#### Fresh Air Intake Kit RXKHRS940-25

Fresh air kit for AXCJC/AXJ systems. Kit contains Current Sensor with Built-in Relay and Switching Power Supply. Requires field supplied ductwork and a fan capable of generating 15 CFM at a static pressure of approximately 0.26" WC.

#### **INTERFACE KITS**

#### **Dry Contact Wire Kit**\* RXXWZX / RXXWZXZ5

Turns system on or off using a normally open circuit. For example in home automation, BMS integration of only On /Off operation, occupancy sensor, key card switch, or lead-lag control of other heating / cooling devices.

Slim Duct Connector Kit RXECS5A

Comes with 5 sets of wires. Can be used to turn unit on / off, wire in float switch, AUX heater, turn on an external device (Fan), or show if the unit is running.

#### Interface Kit Box RXGXXB

Used to conceal Interface Kit RXXCSXZ1.

Human Sensor Kit RXSHZXG For large circular cassette.

#### External input and output PCB Box RXGXRA

For large circular cassette. For installing the External input and output PCB.

Interface Kit

RXXCBXZ2

#### **MISCELLANEOUS**

**3-Pole Single Throw Safety Switch** RXK3PST For use where code requires a disconnect at the indoor unit.

#### 18+18 Combo Fittings Kit RXK9FZ1818

Allows two 18,000 BTU indoor units to be used

on an outdoor ROMH36AFXZJ. Requires special piping; limited to only 18,000 BTU models. Total BTU capacity is limited to 31,600 BTU in cooling. The kit upsizes linesets to 3/8" and 1/2".

#### **Condensate Pump** RXDPB24T

OEM design plugs into factory harness for ease of installation. Rated for 11.8" of vertical lift. Only used with System 336ASXJ2.

#### **Panel Spacer** RXBKXA-W

If there is not enough height in

between the cassette grille and the ceiling surface, the height of the body goes into the ceiling space becomes 2 in. (50mm) lower.

10.0

---- ei Features a large backlit LCD display and displays the room temperature. Provides full feature access to property managers, building owners, and facility maintenance, as well as

the ceiling space, by inserting this spacer

Required to connect RIWH07, 09, and 12AVFJ to Wired Remotes RXRNNUM and RXRVNUM, Dry Contact Wire Kit RXXWZX, and Simple Remote Control RXRSNUM.

Gives the ability to limit the noise of the unit\*, stop the outdoor unit, limit power consumption\*, control the operating mode (Htg/Clg), or use output status to see if the compressor is running. You will need to order a kit for each option.

#### External Connect Kit

Used to connect with various peripheral devices and all A/C PCBs. For control outport port.

Required to connect the 09, 12, 15AHWJ / AHHJ to Wired Remotes RXRNNUM and RXRVNUM Dry Contact Wire Kit RXXWZXZ5, and Simple Remote Control RXRSNUM.

#### Interface Kit RXXCSXZ1

Required to connect RIWH30AVFJ to

Dry Contact Wire Kit RXXWZXZ3, and Lead Lag Control function^.

#### External input and output PCB RXXCSX

For <sup>3</sup>VGSN<sup>2</sup> units, use to connect with external devices and A/C PCB.

\*Will reduce capacity. ^Wired remotes cannot be used when using this feature. This includes RXRNRUZ2, RXRVNUM, RXRNNUM, RXRSNUM.

#### **R410A Swivel Adapter**

RXK9R410A55 In order to minimize incorrect charging of systems with R22 Rheem uses a different access port. Contractors will need this 55-degree swivel access fitting.

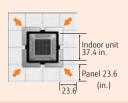

#### **Auto Louver Grille Kit**

RXGXSA-W (for RIDH07/09/12) RXGXSB-W (for RIDH18) RXGXSC-W (for RIDH24)

Auto Louver provides comfortable airflow and blends in with various interiors. Grille can be connected either directly to indoor unit or through the rectangular duct.

#### Wide Panel RXAKXA-W

Hides the gap between the ceiling hole and the cassette grille.

#### **High Humidity Insulation Kit** RXKXRA

Install when the under-roof humidity is over 80% and the temperature is over 86°F (30°C)

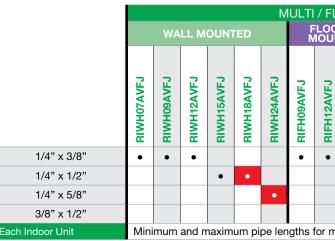

#### LINE SET SIZES AND LENGTHS - SINGLE ZONE

\*18+18 is the only 2 indoor unit combination allowed for ROMH36AFXZJ and requires kit RXK9FZ1818 . While these systems share indoor units, different line sizes are required.

### THINGS TO KNOW WHEN YOU BUY A **RHEEM® DUCTLESS MINI-SPLIT SYSTEM**

#### **COMPLETE MINI-SPLIT SYSTEM LIMITED WARRANTY**

#### **Standard Limited Warranty**

• 5-Year Parts, 7-Year Compressor Warranty

#### **Standard Limited Warranty Extension:**

• The Standard Limited Warranty covering parts and the compressor will be extended to a period of ten (10) years under specific conditions and online registration is required (RegisterMyUnit.com) For Complete details, contact your local Contractor, or go to Rheem.com for a copy of the product warranty certificate.

#### THINGS TO KNOW WHEN YOU INSTALL A RHEEM MINI-SPLIT SYSTEM

#### Warning

Always use a licensed installer or contractor to install this product. Do not try to install the product yourself. Improper installation can result in water or refrigerant leakage, electrical shock, fire or explosion. Use only parts and accessories supplied or specified by Rheem. Ask a licensed contractor to install parts and accessories. Use of unauthorized or improper installation of parts and accessories can result in injury or property damage. Read the owner's operation manual carefully before using this product. The owners operation manual provides important safety instructions and warnings which should be followed closely. For any questions or concerns, please contact Rheem. Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR® criteria. Ask your contractor for details or visit EnergyStar.gov.

#### **Heat Pump Disclaimer**

In most climates a heat pump will handle all of your heating needs. However, this system sometimes requires some other additional source of heat to satisfy heating requirements in the coldest environments. All of the Rheem Mini-Split Heat Pumps use inverter technology and as such offer a wider operating range and more heat capacity than a standard heat pump but will not provide adequate heating if improperly sized or operated outside of its operating range. Specifications vary by model; please consult your contractor before choosing a heat pump as your only source of heat. Systems will maintain temperature up to +/-4 degrees relative to set temperature. To increase energy efficiency on multi-type systems, you should turn off the evaporators when heating or cooling is not needed.

#### CERTIFICATIONS

#### ISO

Certification means that Rheem has passed a series of independent audits proving it maintains a modern quality control system to consistently

Certified Company

provide quality products. These audits assess all a company's systems that affect quality. All Rheem manufacturing facilities have achieved the prestigious ISO 2001 Certification. Rheem was the first HVAC manufacturer in North America to earn this distinction in all its manufacturing facilities

#### AHRI Energy Guide® Program (U.S.)

To view AHRI numbers or Energy Guide labels, please go to www.ahridirectory.org.

#### ASTM

Our outdoor units shall withstand 1,000 hours of salt spray tested per procedure ASTM B117.

The new degree of comfort.®
